RELEVANT EXPERIENCE

The Relish, San Francisco — Intern

APRIL 2019 - MAY 2019

- Refactored React and Redux for performance and coherence. Increased speed of the view by 90%.
- Built CMS for categorization to enable content specialists to update content previously hard coded by engineers, reducing turnaround time for category updates down from several hours to a minute. [Demo](#).
- Added jest test suites to increase coverage of the existing code base.

Alto Pharmacy, San Francisco — Patient Care Specialist

OCTOBER 2017 - JANUARY 2019

- Provided summary of all care to individual physicians (teams of 5+) on a per patient basis to ensure the highest quality care and decision making and compatibility with the patient's insurance.
- Engineered solutions to maximize insurance coverage for patients.
- Completed a blog project to highlight diversity within Alto. Published regular blogs featuring various members of our community.

PROJECTS

Jobly — a fullstack app based off LinkedIn

Built with Redux, React.js, Express, and PostgreSQL. Available [here](#). [Github](#).

MicroBlog — a fullstack app based off Wordpress

Built with Redux, React.js, and PostgreSQL. [Github](#).
